

Guide for Saving Files from iPad PLD to a Thumbdrive

Applications

This guide contains instructions on how to save files onto the thumbdrive for the following applications:

- iPhotos
- Notes
- Freeform
- Keynote, Pages, Numbers, Garageband, Reality Composer
- iMovie
- Clips
- Sketches School
- Procreate
- Notability
- Post-it
- Explain Everything
- Padlet
- Sketchbook
- Flipaclip
- General Steps for Other Applications

Please note that the list is non-exhaustive and based on commonly used applications by schools.

What to Prepare

Things You Need to Save Files on Your Thumbdrive

Before proceeding with factory reset of your PLDs, you will need to:

- Have one thumbdrive that is empty (recommend to be about 64 GB if you have many applications with files to be saved)
- Apple connector that can connect the thumbdrive to the iPad.

Photos

Backing up onto the thumbdrive by copying

How to Save onto the Thumbdrive

1. Launch the Photos app.
2. Tap Select (top right-hand corner).
3. Choose the photos you want to save.
4. Tap the share icon (usually a square with an arrow pointing upward).
5. Select Save to Files.
6. Wait until the files are downloaded.
7. Locate the Backup folder or choose a different location.
8. Create a new folder and rename it to Photo Backup.
9. You should see the folder is empty, but the number of files that are ready to be saved will be at the bottom.
10. Tap Save.
11. Locate Photo Backup - Long press (Press and hold)
12. Tap Compress.
13. Tap "Archive" folder and select "Move"
14. Select Location > "On My iPad" > Backup_<date> > Photo Backup.
15. Tap Backup folder to transfer the zip file.

How to Restore the Files After Factory Reset

1. Open the Photos app on your iPad, then tap Import.
2. Select the photos and videos you want to import, then select your import destination.

Note

Import all items: Tap Import All.

Import selected items: Tap the items you want to import (a checkmark appears for each), tap Import, then tap Import Selected.

Notes

Backing up onto the thumbdrive by copying

How to Save onto the Thumbdrive

1. Launch the Notes app.
2. Tap "On My iPad" for the list of Notes that are stored locally on the iPad.
3. Select the Note you want to backup, and tap on the Share button.
4. Select "Save to Files"
5. Location > "On My iPad" > Backup_<date> >Notes Backup.
If this is the first time, create a new folder and name it Notes Backup.
6. Wait for the Notes to be saved.
7. Repeat steps 1-4 for all the notes that you would like to backup.

How to Restore the Files After Factory Reset

1. The notes will be saved to the Files app in a .txt format.
2. Open the .txt file, copy the contents of the .txt file.
3. Paste it into the Notes app.

Padlet

Backing up onto the thumbdrive by copying

How to Save onto the Thumbdrive

1. Open your padlet and click the Share arrow in the action bar.
2. Scroll down and to the Export options.
3. Click your preferred file format and adjust the settings if needed. Now you have exported your padlet.

Save as image

1. This option will export your padlet as a PNG file.

Save as PDF

1. For this option, you will need to choose your preferred page size and orientation. You will also need to decide if you'd like a Handout or Slides. Then click Generate to complete the export.
2. *A Handout will generate your padlet just as it sounds - with your posts on a paper. Slides will generate each slide on a page in PDF form. With Slides you can decide if you'd like the background included or excluded.
3. Once the PDF loads in a new tab, click the download button in the upper right corner.
4. The attachments of your exported PDF are fully functional, so you can click any attachment to load it in a new window.

Save as CSV

1. This will download your padlet as a CSV file. You can use Numbers on a Mac or Microsoft Excel to open this file.

Save as Excel spreadsheet

1. This will download your padlet as an XLSX spreadsheet file. This exported spreadsheet will contain as many as four detailed worksheets depending on the contents of your padlet: Posts, Comments, Reactions and Summary. Attachments on the padlet will be linked directly on the exported spreadsheet.

How to Restore the Files After Factory Reset

How to transfer PDFs to your iPad.

1. Open iTunes.
2. Click on Device and select Books.
3. Drag and drop the PDFs into your iTunes Books library.
4. Sync your iPad to your newly updated iTunes Books library. You can sync all your files or select them individually.
5. Click Apply to begin the file transfer.

Sketchbook

Backing up onto the thumbdrive by copying

How to Save onto the Thumbdrive

Exporting the current canvas

1. Tap Info Settings icon, then Save.
2. Tap Export to Files .The browser lets you edit the name of the export. This name is only applied to the export and is not assigned to your piece in Sketchbook. If the file had been previously saved and given a name in the Sketchbook Gallery, that name will be applied in the dialog.
3. Once you tap SAVE, the dialog will dismiss and you will return to Sketchbook.

Exporting multiple canvases from the Gallery

1. In the Gallery, pinch-zoom out or tap to enter small thumbnail view.
2. Tap Select in the lower left corner, and select the files you want to export.
3. Tap menu and choose Share or Export to Files.
4. Share will give you the option to choose TIFF or PNG.
5. Export to Files will export TIFF.

How to Restore the Files After Factory Reset
